Contents

VOLUME 5, NUMBER 1, MARCH 1980

L. BARTON BROWNE, A. C. M. VAN GERWEN and R. J. BARTELL: Effects of the ingestion of components of a protein-rich diet on the sexual receptivity of females of the Australian sheep blowfly, *Lucilia cuprina* 1–6

D. L. DENLINGER, J. J. CAMPBELL and J. Y. BRADFIELD: Stimulatory effect of organic solvents on initiating development in diapausing pupae of the flesh fly, *Sarcophaga crassipalpis*, and the tobacco hornworm, *Manduca sexta* 7–15

MARTIN J. R. HALL: Central control of tarsal thresholds for proboscis extension in the blowfly 17–24

FRANZ HUBER, DAVID W. WOHLERS and THOMAS E. MOORE: Auditory nerve and interneurone responses to natural sounds in several species of cicadas 25–45

T. D. HUGHES: The imaginal ecdysis of the desert locust, *Schistocerca gregaria*. I. A description of the behaviour 47–54

T. D. HUGHES: The imaginal ecdysis of the desert locust, *Schistocerca gregaria*. II. Motor activity underlying the pre-emergence and emergence behaviour 55–71

FRANK SLANSKY, JR: Quantitative food utilization and reproductive allocation by adult milkweed bugs, *Oncopeltus fasciatus* 73–86

H. VAN DER STARRE and T. RUIGROK: Proboscis extension and retraction in the blowfly, *Calliphora vicina* 87–92

TOSHINOBU YAGINUMA and OKITSUGU YAMASHITA: The origin of free glycerol accumulated in diapause eggs of *Bombyx mori* 93–97

BOOK NOTICES 99–100

VOLUME 5, NUMBER 2, JUNE 1980

C. M. ANDERSON and E. K. TILLINGHAST: GABA and taurine derivatives on the adhesive spiral of the orb web of *Argiope* spiders, and their possible behavioural significance 101–106

J. DEN BOER and M. H. DEN BOER: Aggregation in the questing tick, *Rhipicephalus pulchellus* 107–110

P. M. GUERIN and J. H. VISSER: Electroantennogram responses of the carrot fly, *Psila rosae*, to volatile plant components 111–119

ILKKA HAVUKKALA: Arthropod orientation in choice chambers as a Markov chain 121–131

ILKKA HAVUKKALA: Klinokinetic and klinotactic humidity reactions of the beetles *Hylobius abietis* and *Tenebrio molitor* 133–140

T. D. HUGHES: The imaginal ecdysis of the desert locust, *Schistocerca gregaria*. III. Motor activity underlying the expansional and post-expansional behaviour 141–152

T. D. HUGHES: The imaginal ecdysis of the desert locust, *Schistocerca gregaria*. IV. The role of the gut 153–164

M. S. MOSSADEGH: Inter- and intra-specific effects of the mandibular gland secretion of larvae of the Indian-meal moth, *Plodia interpunctella* 165–173

SUSAN M. RANKIN and MARY ANN RANKIN: The hormonal control of migratory flight behaviour in the convergent ladybird beetle, *Hippodamia convergens* 175–182

D. J. ROBINSON: Acoustic communication between the sexes of the bush cricket, *Leptophyes punctatissima* 183–189

D. S. SAUNDERS: Some effects of constant temperature and photoperiod on the diapause response of the flesh fly, *Sarcophaga argyrostoma* 191–198

ERNST-AUGUST SEYFARTH: Daily patterns of locomotor activity in a wandering spider 199–206

VOLUME 5, NUMBER 3, SEPTEMBER 1980

J. H. CHOUDHURY and J. S. KENNEDY: Light versus pheromone-bearing wind in the control of flight direction by bark beetles, *Scolytus multistriatus* 207–214

A. G. GATEHOUSE and D. S. HACKETT: A technique for studying flight behaviour of tethered *Spodoptera exempta* moths 215–222

MARTIN J. R. HALL: Circadian rhythm of proboscis extension responsiveness in the blowfly: central control of threshold changes 223–233

W. F. HUMPHREYS and S. E. REYNOLDS: Sound production and endothermy in the horse bot-fly, *Gasterophilus intestinalis* 235–242

P. M. HUYTON, P. A. LANGLEY, D. A. CARLSON and T. W. COATES: The role of sex pheromones in initiation of copulatory behaviour by male tsetse flies, *Glossina morsitans morsitans* 243–252

P. M. HUYTON, P. A. LANGLEY, D. A. CARLSON and M. SCHWARZ: Specificity of contact sex pheromones in tsetse flies, *Glossina* spp. 253–264

MARGARET C. JEFFERSON and MARGARITA AGUIRRE: Methanol tolerances and the effects of methanol on longevity and oviposition behaviour in *Drosophila pachea* 265–269

TERRY L. PAGE and GENE D. BLOCK: Circadian rhythmicity in cockroaches: effects of early post-embryonic development and ageing 271–281

ROBERT SIEBER and GEORG BENZ: Hormonal regulation of pupation in the codling moth, *Laspeyresia pomonella* 283–290

A. VEERMAN: Functional involvement of carotenoids in photoperiodic induction of diapause in the spider mite, *Tetranychus urticae* 291–300

J. P. WARD: Post-mating changes in the behaviour and activity of the female anobiid bread bettle, *Stegobium paniceum* 301–306

BOOK NOTICES 307–308

VOLUME 5, NUMBER 4, DECEMBER 1980

L. B. BJOSTAD and W. L. ROELOFS: An inexpensive electronic device for measuring electroantennogram responses to sex pheromone components with a voltmeter 309–314

J. D. CHARLWOOD and M. D. R. JONES: Mating in the mosquito, *Anopheles gambiae* s.l. II. Swarming behaviour 315–320

V. G. DETHIER: Food-aversion learning in two polyphagous caterpillars, *Diacrisia virginica* and *Estigmene congrua* 321–325

HANS DREISIG: The importance of illumination level in the daily onset of flight activity in nocturnal moths 327–342

J. ERBER, TH. MASUHR and R. MENZEL: Localization of short-term memory in the brain of the bee, *Apis mellifera* 343–358

A. W. FERGUSON and J. B. FREE: Queen pheromone transfer within honeybee colonies 359–366

DALE B. GELMAN and D. K. HAYES: Physical and biochemical factors affecting diapause in insects; especially in the European corn borer, *Ostrinia nubilalis*: a review 367–383

JIM HARDIE: Reproductive, morphological and behavioural affinities between the alate gynopara and virginopara of the aphid, *Aphis fabae* 385–396

J. W. HARGROVE: The effect of ambient temperature on the flight performance of the mature male tsetse fly, *Glossina morsitans* 397–400

R. J. HART, D. J. BEADLE and R. P. BOTHAM: The penetration of ionic lanthanum into the central nervous system of the tick, *Amblyomma variegatum* 401–405

B. M. OKOT-KOTBER: The influence of juvenile hormone analogue on soldier differentiation in the higher termite, *Macrotermes michaelseni* 407–416

M. P. PENER and L. ORSHAN: Reversible reproductive diapause and intermediate states between diapause and full reproductive activity in male *Oedipoda miniata* grasshoppers 417–426

SUSAN SILVER, KLAUS KALMRING and ROLAND KÜHNE: The responses of central acoustic and vibratory interneurones in bushcrickets and locusts to ultrasonic stimulation 427–435
